Prayer of the Month **Lynn Sanner**

Prayer of the Month for November, 2026

Continuing Prayer for Democratic Republic of Congo

We pray for Democratic Republic of Congo (DRC), and neighboring countries in central Africa.

A new strain of **Ebola** virus, called Bundibugyo, was detected in early spring of 2026. According to the Centers of Disease Control (CDC), on October 24, 2026, this Ebola virus had grown to 9,995 confirmed cases and 4,845 deaths.

The current outbreak of Ebola is particularly concerning because there is currently no existing vaccine against this strain of Ebola. However, on Oct. 23, 2026 the World Health Organization (WHO) reported that a clinical trial of the new Tumaini Vaccine against Bundibugyo Ebola has been launched.

We pray for those affected by this deadly disease. Comfort them and their families.

We pray that protective vaccines and effective treatment will be available very soon.

We pray that those who live within reach of the Ebola epidemic will have the courage to follow precautions that they find frightening and outside of their cultural practices so that the spread of this disease may be halted.
