

Prayer of the Month, April 2026

We pray that our building and our programs may continue to serve as safe havens for all who enter.

Our new defibrillator was installed in the fall and a team has been trained in its correct use.

Those who care for our children are required to complete a Safe Sanctuary training that explains appropriate security procedures and how to report indications of abuse that any child indicates.

First aid equipment is available in our kitchen.

Our prayer this month is that we will respond effectively in any case of emergency or potential harm to those in our care.

Our second prayer is one of gratitude for the professional first responders in Mt. Healthy upon whom we rely in emergency situations.
