

Prayer of the Month

June, 2026

We pray for Democratic Republic of Congo (DRC), Uganda, and neighboring countries in central Africa.

A new strain of **Ebola** virus, called Bundibugyo, was detected in early spring of this year. As of May 20, 2026, this Ebola virus had spread to 598 suspected cases and 139 Ebola suspected deaths had been reported.

The current outbreak of Ebola is particularly concerning because there is currently no existing vaccine against this strain, nor is there an approved targeted treatment for it.

We pray for those affected by this deadly disease and we pray that vaccines and effective treatment will be available quickly.
